Switch the Charger light button / long press the button to turn on/off the light

2.4G installation steps and instructions:

When you want to use the 2.4G channel of the mouse, turn the power switch to the 2.4G position, then take out the receiver 2.4G receiver, and plug the receiver into a free USB port of the computer, then the mouse will automatically install the corresponding adaptation software. When the installation is complete, the computer prompts that the installation is complete and ready to use, the mouse can be connected to the computer. If there is no response after plugging in the receiver, you need to replace another USB port. At this time, the computer will automatically match the code and install the corresponding adaptation software. Generally, the computer will prompt that the installation is complete and can be used, which means that the mouse is the same as the computer 2.4G. The code pairing was successful.
