Compatible Base: PXN Bases

01 - English

02 Product Content

03 Installation

• Pedal Assembly

- Step 1 Take out the pedal set and footboard.
- Step 2 Connect the clutch and accelerator to the brake pedals with a RJ cable.
- Step 3 Use M4 allen wrench and KM4*6mm screws to fix the three pedal sets on the pedal board.

02 - English

• Pedal's Panel Height Adjustment

- Step 1 Use M4 Allen Wrench to remove the two screws from the foot panel.
- Step 2 There are two adjustable positions; adjust the panel height as needed and then tighten the screws.

• Pedal's Panel Angle Adjustment

- Step 1 Use M4 Allen Wrench to remove the screws on the lower part of the module side and loosen the screws on the upper part.
- Step 2 There are three adjustable positions, adjust the panel angle as needed and then tighten the screws.

• Stand Fixing

- The pedal can be mounted on the stand or on a racing seat.
- Step 1 Place the pedal and align the bottom screw holes with the mounting holes.
 - Step 2 Secure the pedal with screws and nuts.
 - Step 3 Use the wrench to tighten the screws and nuts.

04 Connection with PC

- Step 1 Fix the pedal in a proper position.
- Step 2 Connect the pedal to the PC with the USB-A to Type-C cable.
- Step 3 After successful connection, press each pedal to its maximum travel to calibrate.

05 Connection with PXN Wheel Base

- Step 1 Fix the pedal in a proper position.
- Step 2 Connect the pedal to the PXN wheel base with the RJ45 data cable (or Type-C to Type-C cable).
- Step 3 After successful connection, press each pedal to its maximum travel to calibrate.
